

Router Shroud (sold with or without Dotco Router)

Our Tool Specific Router Shroud complements a 23K RPM 1¼" Dotco Router.

Every shroud kit includes: Standard Shroud, Spanner Shroud, Router Adapter Ring, 2' x 1" vacuum hose whip, and swivel adapter for connection to 1" vacuum hose. Refer to hose and fitting section for other hose adapters.

Features

- Precision finished anodized aluminum housing
- Shroud does not obscure visibility
- Positive Lock hose fitting – hoses won't pull free
- Router adapter for depth control
- Designed in cooperation with NAVAIR

Inline Router (sold with or without Dotco Router)

The inline router provides the power and control needed for trimming and routing along fixtures. Carbon fiber, aluminum, and other substrates generate large amounts of airborne dust and pose a serious risk to workers and aerostructures. This router collects the airborne dust and helps to reduce the chips and debris. The shroud connects to a portable or central vacuum. This shrouded router is a standard in NAVAIR and USAF maintenance kits. The shroud is available alone or with a 0.9HP motor.

Features

- 2' x 1" vacuum hose whip
- Swivel adapter for connection to 1" hose.
- Positive Lock hose fitting – hoses won't pull free
- Depth Adjustment
- Router Guides & Skirt
