

THE SCORPION

HANDHELD HEPA VACUUM

The Scorpion HEPA Vacuum is an industry first. The Scorpion is a pneumatic vacuum that is so small and light it can be carried by hand or worn over the shoulder. Its powerful air motor easily picks up dust and debris, and helps maintainers control FOD while also protecting them from exposure to heavy metals like cadmium, hexavalent chromium, lead, and more. The Scorpion can be used for cleanup after manufacturing and maintenance, or it can be paired with a shrouded tool to control dust and debris while sanding, grinding, cutting, or drilling.

The Scorpion features a tough Lexan canister which showcases the cyclonic action of the vacuum. You'll get hours of enjoyment watching rivets, dust, and metal shavings spinning around the belly of the Scorpion. The HEPA cartridge filter provides the right level of protection, exhausting clean air back into the workplace. For vacuum sanding or shrouded tools, the Scorpion features pass through compressed air, so you'll only need one air line to power the vacuum and the tool.

Features:

- Recovery capacity 1qt
- HEPA filter efficiency H13 99.97% @ 0.3 μ
- Consumes 15 cfm @ 90 psi
- Produces 45 cfm @ 50 "H₂O
- Quiet at only 77dBA
- Lexan canister is virtually indestructible
- 7" Diameter by 9" high

Cleanup Kit Includes:

- 4' x 1" Vac Hose
- 24" x 3/4" Tygon FOD Wand
- Prefilter 5 pack

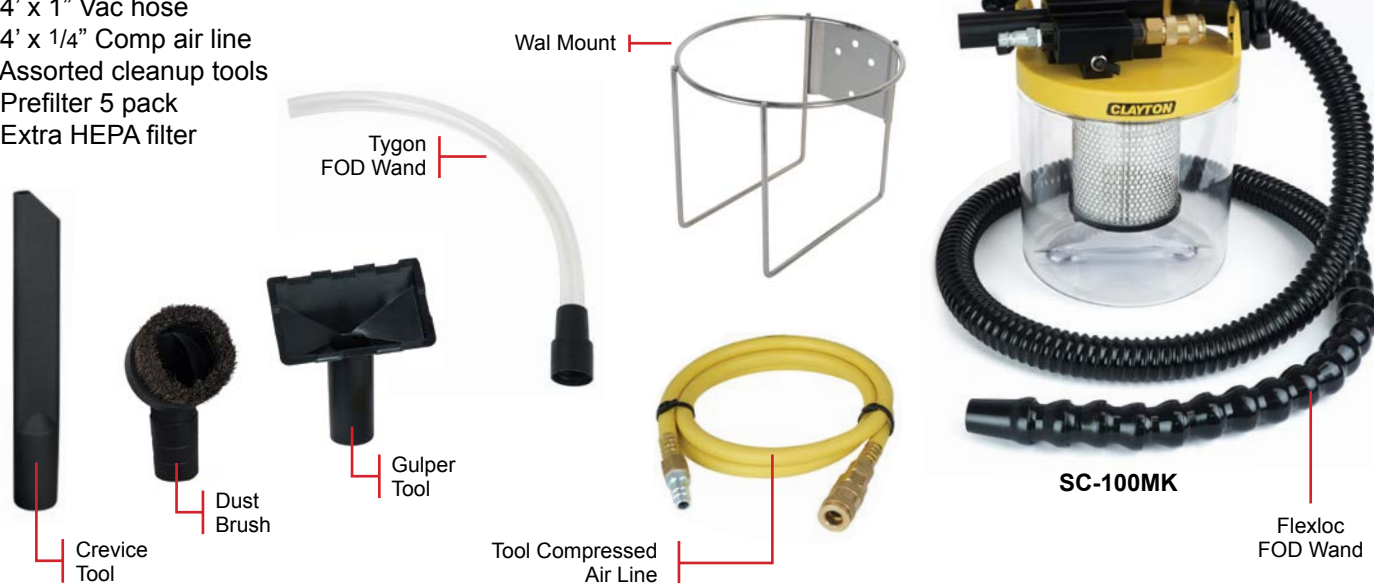

SC-100CK

Vacuum Sanding Kit Includes:

- 4' x 1" Hose whip
- 4' x 1/4" Compressed air line
- Prefilter 5 pack

Air Powered**Military Combo Kit****Everything you need for vacuum sanding and cleanup**

- 4' x 1" Vac hose
- 4' x 1/4" Comp air line
- Assorted cleanup tools
- Prefilter 5 pack
- Extra HEPA filter

Piranha Spot Blaster

Our portable pneumatic recirculating Spot Blaster removes corrosion and coatings from fasteners and small areas. You choose your blast media, and this tool does the rest. A pull of the trigger, and the media is safely delivered in a enclosed concentrated blast. The integrated Scorpion HEPA vac collects and recirculates the media.

Includes

- Spot Blaster Gun & Vac
- Shoulder Strap
- 4 Assorted Tips

Air Hammer Kit

Air Hammers are great for loosening rusted bolts, cutting sheet metal, and breaking welds. The Clayton Air Hammer kits include vibration damped air hammers with quick release chucks and powerful 22mm bores. The short barrel compact hammer with a 2-1/4in stroke is rated at 3,800 blows/minute for faster more controllable cutting. The long barrel hammer is rated at 2,700 blows/minute with 3-1/2in stroke for jobs requiring more impact force. They are housed in tough protective cases with 5 assorted chisels each.

Includes

- Air Hammer with quick release chuck
- 5 assorted chisels
- Plastic case

- 3-1/2in stroke
- 2,700 blows/minute

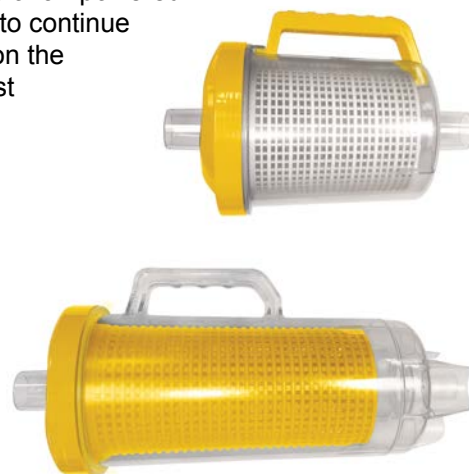

- 2-1/4in stroke
- 3,800 blows/minute

FOD POD

The Clayton FOD Pod is designed to be used with any Clayton electric or air powered vacuums. It intercepts large debris like rivet stems while allowing dust to continue onto the vacuum. The FOD Pod is available in two sizes depending on the amount of debris to be collected. An additional vacuum hose of at least 5ft is required for connection to the vacuum.

FP-200-02		FOD Pod Large	

FOD POD C-130 Vacuum System

The Clayton FOD Pod C-130 Kit is designed to be used with the C-130 fuel & oxygen overboard vent port. The vent port is capped with a AN929-16 cap. The FOD Pod C-130 Kit comes with a 1-1/4in rubber hose cuff that will push onto this port when the cap is removed. When the C-130 is pressurized and at altitude the pressure differential between the cabin and outside air act as the vacuum source.

Features:

- 2ft hose for connection to the aircraft
- 2 x 20ft vacuum hoses for a total of 40ft reaches tail and cockpit
- 2 piece wand
- Dust brush & Crevice tool
